Translating Technology to Improve Patient Outcomes, Enhance Quality, and Reduce Costs
Updates Every 14 Days, Are You Crazy?

Why would DDOTS send out updates to their systems every couple of weeks?

If CREDIT is so good, why do you need to send out Upgrades every 14 days?

The answer to that is easy. Users have ideas. Ideas mean more efficient use of staff time. Saving staff time translates into higher quality research. And, users have ideas.

From the beginning in May 1995, CREDIT has been "User Driven". That is why it is still referred to across the country as the "CREDIT Project". Every new installation brings on a new group of experienced research specialists. And they have ideas.

It is the position of DDOTS that these ideas get shared with staff in all institutions. So, when Jerry has an idea in Newark; DDOTS listens. Then the idea goes into analysis and development. Finally it is sent to Jerry for testing. Once approval is given, that new code is automatically uploaded into all CREDIT institutions and becomes available for enabling. That translates to saving staff from those organizations time too.

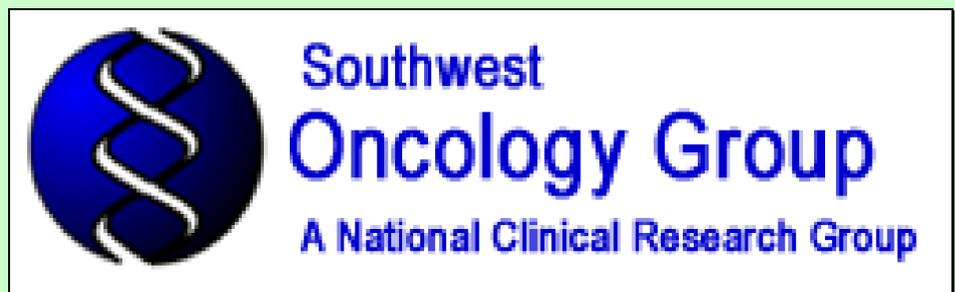

Perhaps a week later, Jennifer is using Jerry's new report and she has an idea of how to improve it;

Visit the DDOTS Exhibit Table at the Fall Meeting, September 26. Rochester, MN

Visit the DDOTS Exhibit Table at the Fall Meeting, September 28 & 29. Denver, CO

Visit the DDOTS Exhibit Table at the Fall Meeting, October 5 & 6. Huntington Beach, CA

DDOTS listens. This process is played over and over hundreds of times a month, and CREDIT just gets better and better and better.

CREDIT Users have ideas. DDOTS Listens. Updates are automatic and frequent. CREDIT gets better, staff get happier, and administration is more efficient. Users have ideas....

The **DDOTS Navigator** is published to introduce news that has occurred in the ongoing development of **Cancer Research Environmental Data Information Tracking (CREDIT)**.

Since 1995 CREDIT© has been in constant growth.

May of 2007, marked the 12th anniversary of this powerful system. Installed at sites across the country, CREDIT© is the leader in Collaborative Clinical Research Administration.

DDOTS, Inc.

Grant Period:

6/5/1998 – 12/31/2001

The development of IDEA© Web-based software was supported, in part, by **Grant No. 1U43CA78105-01** from the **National Cancer Institute**, Small Business Innovation Research program. Its contents are solely the responsibility of DDOTS, Inc. and do not necessarily represent the official views of the National Cancer Institute.

DDOTS September Collaborators

Sheila Evans and John Grouse
Sibley Memorial Hospital
Washington, DC

Sheila Evans was instrumental in getting the CREDIT system installed in September, 2005. While staff came up to speed with that solution, she was already planning on installing the Pharmacy Component.

"Investigational Drug Environmental Accountability" (IDEA) was installed under the direction of John Grouse. Both installations meet with great success, and Evans knows why.

Evans has planned annual training for her staff since the initial sessions in 2005. Again, this September, she has 2 days on-site training planned for her staff.

Congratulations, Sheila, John and supporting cast. Well done!
