

Translating Technology to Improve Patient Outcomes, Enhance Quality, and Reduce Costs

”How do I get started?”, The Inside Scoop

Zero Delay Time from Training Sessions to Implementation

Ok, so we know we need a system to manage our clinical trials. Administration is ready, staff is ready, “When can we begin... ‘Go Live’ with CREDIT?”.

Converting existing data is always an option, but in some cases there is no existing database to transfer. In either case, CREDIT is ready to be implemented immediately during the on-site training sessions.

Unlike any other system, CREDIT© comes complete with every protocol in the DDOTS Library... literally thousands! This means there is no “loading” protocols prior to creating detailed patient calendars per protocol/arm. It also means the Regulatory team has a system that is immediately available. All other systems come “Dry” or “Empty” requiring staff to invest months and months of preliminary protocol loading prior to use.

“Sure, and what happens when training is over? Is there a help Grace Period of support?”.

“Support” is what DDOTS is all about. Because all of the systems (IDEA, IRBANA, and CREDIT) are collaborative projects, support is never-ending! “Are you kidding me? I can call tomorrow, next week, next month, next year....?”. Yes. And get this... there is **absolutely no “ticket” or “incident” fee!**

We know how demanding your day-

Christiana Care, Newark DE Gets Training Using the CREDIT© System

Kandie Price

Jackie Brennan-Misko

Christiana Care Health, Newark, DE recently installed the Clinical Trials System (CREDIT©) as well as the Regulatory Office solution (IRBANA©) for the ultimate research program.

Thelma Kempista

Marlene Johns

Training sessions covered Patient tracking, Regulatory Control, and Reports. Staff learned how to automatically create patient calendars using the protocols already loaded into CREDIT. On the Regulatory side, Reviews, Revisions, Deviations, Adverse Events were logged and “Exported” to the Regulatory Office where IRBANA imported all the staff work to be included in the IRB Agenda.

to-day workload is, and we have no intention to add confusion and disruption to that. Have a problem using CREDIT, send an email or pickup the phone. We respect that your time is valuable! "Support", that is why staff across the country choose DDOTS systems.

"How do I get started?", simple, ask DDOTS to be your partner, your collaborator, your solution.

Call DDOTS now for an introductory tour of what CREDIT, IDEA, and IRBANA solutions can do for your research. Or, visit the DDOTS Website: <http://www.ddots.com>

The **DDOTS Navigator** is published to introduce news that has occurred in the ongoing development of **Cancer Research Environmental Data Information Tracking (CREDIT)**.

Since 1995 **CREDIT**® has been the Premier Research Management System. May of 2008, marks the 13th anniversary of this powerful system. Installed at sites across the country, **CREDIT**® is the leader in Collaborative Clinical Research Administration.

DDOTS, Inc.

Grant Period:

6/5/1998 – 12/31/2001

The development of **IDEA**® Web-based software was supported, in part, by **Grant No. 1U43CA78105-01** from the **National Cancer Institute**, Small Business Innovation Research program. Its contents are solely the responsibility of DDOTS, Inc. and do not necessarily represent the official views of the National Cancer Institute.

DDOTS February Collaborators

Karen Cheek

Peggy Verrill

Karen Graber

Shaneses Brady

Decatur Memorial Hospital Cancer Care Institute - Decatur, IL

Karen Cheek was instrumental in getting the CREDIT system installed in Decatur, IL in November, 2007. Karen was no stranger to CREDIT. She was working with the Carle Cancer Institute, Urbana, IL and was chosen as one of only two "Pilot Sites" for the new NCI Sponsored CREDIT System... that was 1997.

Karen presented CREDIT as an option to the Decatur Staff, and the rest is history. The Decatur CCOP now has CREDIT installed and received 3 days of on-site training.

Not only did the Decatur CCOP install CREDIT, they also have the Investigational Pharmacy Module (IDEA) installed.

Perhaps your team would like to have a Web Cast Presentation. Contact DDOTS today to see this seasoned, 12+ year collaborative project that was supported, in part, by a grant from the National Cancer Institute... the one, the only, CREDIT.
