Translating Technology to Improve Patient Outcomes, Enhance Quality, and Reduce Costs

CREDIT© for Research, IRBANA© for the IRB!

Institutions Install Dual Systems for Complete Research and IRB Solutions

The CREDIT© System for Clinical Trials Management has been around since 1995. Many institutions and private practices across the nation have installed this solution to streamline the management of clinical trials, both study and patients. A recent trend has emerged where installations of CREDIT© are now installing IRBANA© to manage their local IRB Offices.

"Institutional Review Board Activity Negotiation Accountability" (IRBANA©) is to the IRB Team what CREDIT© is to the Research Team. Specifically, the Research Team uses one of the CREDIT© modules to log submissions to the IRB. Those submissions are flagged for review, and after the IRB Office acknowledges the Approval (or some other action), that action is updated on each submission in CREDIT©.
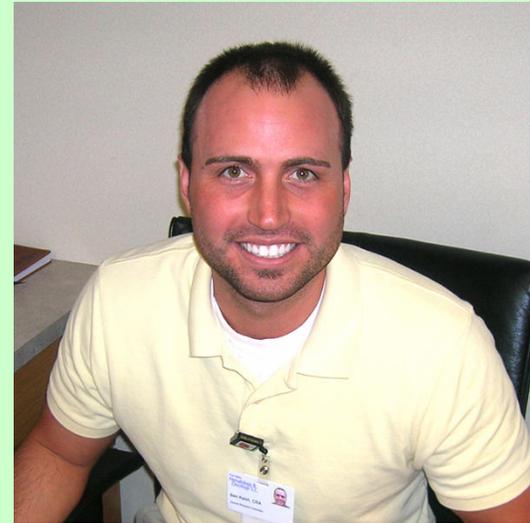

Between the CREDIT© event logging and physical or electronic submission, there is a communication port that allows submission log entries to be exported and sent to the IRB Office. There, the IRB Team, using IRBANA© imports the events. The result is an immediate ability to generate a Meeting Agenda utilizing all of the imported data from CREDIT©. The Agenda is normally 95% complete without ever typing a single word. Finally, IRBANA© exports the entire Agenda to Word for final document touch-up.

CREDIT© and IRBANA© are an unparalleled set of solutions for the busiest of Research Departments and Institutional Review Board Offices. CREDIT© is to Research as IRBANA© is to the IRB.

CREDIT November Collaborators
Fox Valley Hematology & Oncology, Appleton, WI

Dale Grimmer

Ben Kelsh

Fox Valley Hematology & Oncology recently installed CREDIT© to manage their Research Department.. Office lead is Dale Grimmer who was instrumental in acquiring CREDIT© for this very busy Institution. Multiple Institutional Review Boards require CREDIT© to be configured for separate IRB Submissions. These independent Event Logs demonstrate the flexibility of this powerful solution.

Matt Lasowski

From Great Falls, Montana to Newark, Delaware; Fargo, ND to Miami Beach, FL, all members of CREDIT© have a say in the continuing development of this ongoing project. What began as an Alpha Project in 1995 has been influenced by numerous organizations since inception.

Originally the project was piloted in the Michigan Cancer Research Consortium, Ann Arbor MI, and the Carle Cancer Center Irbana, IL. Within the following 24 months, the Mayo Clinic, NCCTG, NSABP, and the NCI would pitch in to evaluate and offer suggestions to promote the project through Beta Testing and final release for membership in 2000.

Today, more than 100,000 patient calendars have been created on over 30,000 protocols. That translates to over 6 million patient calendar events scheduled nation wide. With nearly 250 hospitals and institutions participating with CREDIT©, it is little wonder why the system is the clear leader in Collaborative Research Solutions. No other company or product can compare to the user driven system CREDIT© has evolved to.

When you ask the difference between a "Clinical Management System", and the "Collaborative Project" CREDIT© represents, the distinction is clear: "Membership Support". Absolutely no other company provides the level of help at absolutely no extra cost what-so-ever. DDOTS can do that because all institutions and users of the system are working together every day to make CREDIT© even better. Since 1995 **CREDIT©** has been the Premier Research Management System. Licensed at sites across the country, **CREDIT©** is the leader in Collaborative Clinical Research Administration.

CREDIT© & IRBANA© the Perfect Team

CREDIT© Main Menu

IRBANA© Main Menu

The similarities of the Main Menu of both CREDIT© and IRBANA© is emblematic if their inter-communication capabilities. CREDIT© exports IRB Submissions and electronically sends those logged events to the IRB Office. There, the file is imported into IRBANA© resulting in a meeting Agenda that is 95% complete! The Agenda is then exported to Word© for Windows for final touch-up.

CREDIT© & IRBANA©, the perfect team for your team!
